- Excel Reporting & Data Analysis
- Power BI (Basic Dashboards)
- AI Workflow & Automation (ChatGPT)

INTERESTS

- Internet Surfing
- Written Poetry

EXPERIENCE

Uma Logistics and Cargo Pvt Ltd

June 2024 – May 2025

Customer Service Executive

- Managed customer service operations for shipments, including issue resolution and status updates.
- Handled complaints professionally and ensured timely coordination with operations for quick closures.
- Maintained accurate reporting and documentation for shipment processing and service quality tracking.
- Managed end-to-end operations for 20+ clients, ensuring timely dispatch, tracking, and delivery coordination.

Daikcell India Private Limited

June 2025 – Present

Logistics Manager

- Managed day-to-day logistics operations, dispatch planning, and shipment tracking for on-time deliveries.
- Coordinated with warehouse, courier partners, and internal teams (Sales/Warehouse/Support) to improve turnaround time.
- Handled customer return shipments: pickup coordination, QC for damaged goods, restocking workflow, and documentation.
- Performed freight cost analysis, bill verification, and rate negotiation to reduce operational costs and improve margins.
- Supported legal/compliance coordination for disputes, fraud cases, and policy adherence.

Key Achievements:

- ✓ Reduced logistics costs through targeted courier rate optimization.
- ✓ Improved shipment visibility with enhanced tracking process.
- ✓ Streamlined return and refund workflow reducing processing time.
- ✓ Granted Operations Manager access on Flipkart Seller account – DaikcellIndia.

EDUCATION

Meerut Institute of Technology, Meerut U.P.

2016

B. Tech

PROJECTS

Inventory & Billing Management System

- Developed a system for invoice, credit note, and complaint form generation with AI-assisted workflow automation.
- Improved speed and consistency of documentation; currently used in company mainstream operations.

Amazon Return & Refund Data Automation System

- Built a Google Sheets workflow to fetch, clean, and manage return/refund data for MIS reporting.
- Enabled faster reporting and better visibility into return trends and refund issues.
- Streamlined loss tracking and reconciliation for faster identification of financial losses.

Company Inventory Management Software (Ongoing)

- Developing a full-featured platform to replace manual stock tracking processes.

Manual Testing – FirstCry.com

- Applied testing to validate website functionality, usability, performance, and security checkpoints.

Bubble Sort Typing Game

- Developed an interactive typing game based on the Bubble Sort algorithm to improve typing speed and sorting logic.
- Implemented real-time user input validation and performance tracking (speed and accuracy).

Smart Lighting System in Highways (B.Tech Final Year Project)

- Designed an energy-efficient smart lighting concept with automation for improved safety and cost savings.
